Helps Burn Fat

## Key Facts

- Naturally present into the muscle, the L-Carnitine is an amino acid that plays a **principal component** of the fatty molecules transport system towards the cellular mitochondria.
- It is at the mitochondria that fat is burned for energy
- L-Carnitine enables you to maintain an **optimal energy** level while decreasing the fat deposit.
- Perfect during a slimming program and makes exercise easier.
- The L-Carnitine in this liquid form enables a **quicker assimilation** owing to an almost direct absorption at the stomach level.
